FISCAL ANALYSIS

ASSUMPTION

Officials of the **Department of Revenue (DOR)** state this legislation increases the income tax deduction for long term care insurance premiums from 50% of the non-reimbursed amounts paid to 100%.

Increasing the deduction from 50% to 100% will not impact the Department of Revenue. However, section 135.096 is not effective until January 1, 2000, and the Department will maintain the same impact for administering the original deduction as reported in the fiscal note last year for Senate Bill 8 (LR 1899-01).

Officials of the **Office of Administration (COA)** state that according to the Department of Insurance, Missourians paid \$87.4 million in premiums in calendar year 1997 for long term insurance. Using a marginal tax rate of 6% and a 3% growth rate for premiums would generate a loss of (\$2.9 million) in FY 2001, (\$3.0 million) in FY 2002 and (\$3.03 million) in FY 2003.

This proposal would result in a decrease in Total State Revenues.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

DESCRIPTION

Under current law, a resident individual taxpayer may deduct 50% of any non-reimbursed premium paid for long-term care insurance. The bill increases the percentage to 100% for tax year 2000.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
